How about joining the fastest growing IT Information Service in Europe!

Biztech is the fastest growing IT –Information Service company in Europe. We are already operating in 10 countries across the continent. Our unique service concept is based on thousands of customer interviews conducted annually, in order to map current situation and development roadmaps on the radar screen.

The format is simple: By participating in one of our day topic phone interviews – you will be provided a stream of market reports covering some of the most key areas in IT. Including new technologies gaining momentum, service provider ratings and development ideas and initiatives in pipeline. All this in a compact visual package. Strategic partners for this Biztech Information Service are some of the leading technology vendors in business. Participation for you is totally free of charge. Only requirement is a small time investment from you. One interview does not take more than 10–15 minutes.

Our customers are capitalizing the Biztech Information Service on several ways:

- Following new trends and directions compared to own operation

- Benchmarking own environment

- Making technology choices and deployment with right timing

- Evaluating Service Providers

- Identifying new ideas as fuel for own development initiatives

- Building connections with leading vendors in desired solutions areas

After participating in our short interview, you will get your personal access to Biztech Information Service -online dashboard.

It will provide you a dynamic regularly updated online information tool in up to 15 different solution areas. Capitalizing day topic market information does not get any easier than this.

Welcome joining the service! Request additional information by sending an email to the address below. We will contact you shortly.
